DISCLAIMER

These training materials are intended as general guidance only and may or may not apply to a particular situation based on the circumstances. The materials do not create any legal rights or impose any legally binding requirements or obligations on the Federal Deposit Insurance Corporation (FDIC) and U.S. Small Business Administration (SBA). The FDIC and SBA make no claims or guarantees regarding the accuracy or timeliness of this information and material.

The content of this training material is not designed or intended to provide authoritative financial, accounting, investment, legal or other professional advice which may be reasonably relied on by its readers. If expert assistance in any of these areas is required, the services of a qualified professional should be sought.

Reference to any specific commercial product, process, or service by trade name, trademark, manufacture, or otherwise does not constitute an endorsement, a recommendation, or a preference by the FDIC and SBA or the United States government.

Getting Started

Use this guide to help teach this training in an informative, engaging, and effective manner.

You can customize the information in *Risk Management for a Small Business* to meet the needs of your audience. However, it is usually a good idea to include:

- **Introductions.** Allows you to “break the ice,” create active instructor-participant dialogue, and set the tone for the session.
- **Agenda and Ground Rules.** Helps participants understand how the training will be conducted.
- **Expectations.** Gives participants the opportunity to tell you what they expect to learn from the training.
- **Objectives.** Helps participants place the information to be learned in the proper context and ensures that the content is consistent with their expectations.
- **Explanation of Participant Guide Format and Contents.** Serves to keep participants on track with the presentation.
- **What Do You Know? Form and/or Pre-Test.** Helps you and training participants to determine what they already know or do not know so you can customize the presentation accordingly.
- **Discussion Points.** Helps participants to reinforce learning.
- **What Do You Know? Form and/or Post-Test.** Helps you and training participants to gauge how well participants have learned the presentation content, giving you an indication of what content to review, if any, and what additional materials participants may want to review on their own.

Icons

The following icons may be used throughout this instructor guide to indicate an activity type.

Presentation

Present information or demonstrate an idea.

Review

Refer participants to and summarize material provided in the participant guide.

Discussion

Facilitate a discussion about a topic as directed.

Assessment

Direct participants to take a short test.

Ask a Question

Present a problem or question for discussion.

Training Overview

Purpose

The Risk Management for a Small Business module provides an overview of risk management and is designed to help participants to understand how risk management can benefit their business.

Objectives

After completing this module, you will be able to:

- Identify the common risks associated with a small business.
- Identify the external and internal factors which affect risk for a small business.
- Identify situations that may cause risk for a small business.
- Identify the common warning signs of risk for a small business.
- Implement, monitor, and evaluate a risk management plan for a small business.

Presentation Time

Each topic has an approximate completion time. Use the suggested times to personalize the module based on your participants' needs and the given time period. Allow extra time for activities and questions when teaching larger groups.

Materials and Equipment

The materials and equipment needed to present this module are:

- Instructor Guide
- Participant Guide
- PowerPoint slides (e.g., FDIC_SBA_RISK_MANAGEMENT.pptx)
- Audiovisual equipment (such as a computer with Microsoft Office PowerPoint, overhead projector, and microphone, if appropriate)

Training Discussion Points

- Discussion Point #1: Risks from Positive Situations
- Discussion Point #2: Internal Risks
- Discussion Point #3: External Risks
- Discussion Point #4: Risks to Continued Operations
- Discussion Point #5: Assets

Instructor Notes

Presentation

5 minutes

Slide 2

Introduce yourself and share a little of your background and experience. Record participants' expectations, questions, and concerns on chart paper. If there is anything you will not be teaching, tell participants where the information can be obtained. Check off their responses at the end of the training to show expectations were met.

Review Participant Guide contents and organization with participants.

Welcome

Welcome to *Risk Management for a Small Business*. By taking this training, you are taking an important step to building a better business.

Agenda

We will discuss concepts, do an activity, and have time for your questions. There will be at least one 10-minute break during the class.

Ground Rules

If you have experience or knowledge in some aspect of the material, please share your ideas with the class. One of the best ways to learn is from each other. You might be aware of some method that has worked well for you or some pitfall to avoid. Your class contribution will enhance the learning experience.

If something is not clear, please ask questions!

Introductions

Before we get started, I will share a little about myself and I would like to know a little bit about you. As you introduce yourself, state:

- Your expectations
- Questions and/or concerns about the training content

Participant Materials

Each of you has a copy of the *Risk Management for a Small Business Participant Guide*. It contains information and discussion points to help you learn the material.

What questions do you have about the training overview?

Slide 5

Use the What Do You Know? form and/or the Pre-Test to gauge participants' prior knowledge of the content and to customize your presentation, focusing on content with which they are least familiar.

What Do You Know?

Before we begin, we will see what you know about Risk Management for a Small Business.

[If using the What Do You Know? Form]

The What Do You Know? form on page 4 of your participant guide lets you compare how much you know before the training and how much you learned after the training. Please take a few minutes now to complete the “Before Training” column. Which statements did you answer with “Disagree” or “Strongly Disagree?” ***[Note: If time is limited, make sure you cover these content areas.]*** We will complete the second column when we finish the training.

[If using the Pre-Test]

Take a few minutes to complete the Pre-Test on page 5 of your participant guide. Which questions were you unsure of or were unable to answer? ***[Note: If time is limited, make sure you cover these content areas.]***

As we progress through the training, you will see if you answered each question correctly.

What Do You Know?

Risk Management for a Small Business

Instructor: _____ Date: _____

This form will allow you and your instructor to see what you know about risk management, both before and after the training. Please read each statement below. Circle the number that shows how much you agree with each statement.

| | Before Training | | | | After Training | | | |
|---|-------------------|----------|-------|----------------|-------------------|----------|-------|----------------|
| | Strongly Disagree | Disagree | Agree | Strongly Agree | Strongly Disagree | Disagree | Agree | Strongly Agree |
| 1. I can identify the common risks associated with a small business. | 1 | 2 | 3 | 4 | 1 | 2 | 3 | 4 |
| 2. I can identify the external and internal factors which affect risk for a small business. | 1 | 2 | 3 | 4 | 1 | 2 | 3 | 4 |
| 3. I can identify situations that may cause risk for a small business. | 1 | 2 | 3 | 4 | 1 | 2 | 3 | 4 |
| 4. I can identify the common warning signs of risk for a small business. | 1 | 2 | 3 | 4 | 1 | 2 | 3 | 4 |
| 5. I can implement, monitor, and evaluate a risk management plan for a small business. | 1 | 2 | 3 | 4 | 1 | 2 | 3 | 4 |

Pre-Test

Test your knowledge of risk management for a small business before you go through the course.

- 1. Which type of risk can generally be controlled?**
 - a. Internal risks**
 - b. Systematic risks
 - c. External risks
 - d. Market risks
- 2. It is possible to create a business plan that identifies every risk your business might face.**
 - a. True
 - b. False**
- 3. While reviewing your business plan you identified several risks that could halt, slow, or affect the profit of your business. What should you do with these risks?**
 - a. List them by name
 - b. Rank by importance
 - c. Identify the potential cost
 - d. All of the Above**
- 4. If needing help with risks associated with your business you should _____.**
 - a. Work the risks by yourself
 - b. Seek outside assistance**
 - c. Ignore the risks
 - d. Market the risks
- 5. Which of the following are common ways to avoid risk? Select all that apply.**
 - a. Communicating risks you've identified to key employees**
 - b. Making your expectations clear to employees**
 - c. Developing support systems to care for your family needs**
 - d. Training staff on the business continuity plan**
 - e. Purchasing insurance**
 - f. Planning emergency contingencies**

Risk Management

- Identifying areas of threat to the business
- Assessing the potential impacts and managing these for the benefit
- Growth and continued existence of the business

SBA RISK MANAGEMENT 6

Slide 6

Risk Management

Risk management applies to many aspects of a business. Your business is subject to internal risks (weaknesses) and external risks (threats). Generally, you can control internal risks once you identify them. However, external risks may be out of your control.

Not all risks come from negative sources. Risks may come from positive sources, or opportunities. Expansion and growth are opportunities, but they also bring additional risk.

The ultimate goal is to minimize the effects of risks on your business.

Discussion Point #1: Risks from Positive Situations

Discussion Point #1: Risks from Positive Situations

What positive situations or opportunities can you think of that may be risks?

What positive situations or opportunities can you think of that may be risks?

Examples could include: Sharply increased sales or orders, competitor goes out of business giving you more business, or changes in laws that boost the business.

Slide 7

Refer to the participant guide.

Instructor Notes

Presentation

10 minutes

Slide 8

Internal Risks

Let's begin with identifying some internal risks.

Human Risks

The human component of your business is a source of risk. Think about these possible human risks to your business:

Human Risks

- **Death**
 - Owner
 - Employee
- **Illness**
 - Short term
 - Long term
 - Indefinite

Illness and death. A business owner or employee may be ill for a day or be unable to work for months. The death of a person involved in a business poses a risk to continued operations.

Theft and fraud. Most businesses want to have an honest working environment, yet theft by employees and employee fraud are major risks businesses face. Timecard fraud is a risk. Diverting funds to fictitious accounts are accounting risks.

Low employee morale. Unhappy employees can cost money through negligence or through willful acts. For example, an employee who forgets to reorder inventory is a risk to sales because back orders lead to cancellations.

Slide 9

Slide 10

Instructor Notes

Equipment and Information Technology

Equipment and Information Technology Risks

- **Equipment breakdowns**
 - New equipment integration
 - Worn older equipment
 - Damage to vehicles

SBA RISK MANAGEMENT 11

Slide 11

Equipment and Information Technology Risks

- **Information technology downtime**
 - Lack of backup or recovery system
 - Updates and repairs
 - Power and connectivity (physical damage and outdated systems)
 - Lack of administrative controls

SBA RISK MANAGEMENT 12

Slide 12

Other Internal Risks

- **Physical plant repairs**
 - Breaks in lines or utilities
 - Routine maintenance
- **Incidents**
 - Work related injuries
 - Damage to others' property by employees
 - Damage to your property by others

SBA RISK MANAGEMENT 13

Slide 13

Older equipment may run slower or require more maintenance than new equipment. New equipment may require adjustments to work with older equipment.

Worn parts may cause damage or cause company vehicles to break down. What would a non-working delivery van cost a business for one day?

Downtime from physical damage or outdated systems may slow business profits. Most businesses rely on a computer system to process credit cards. These systems are risks to continued business when they are not working, especially if no backup plan exists. Lack of administrative controls may lead to downtime, in addition to fraud and theft.

Other Internal Risks

Another source of risk might be the physical plant of your business. Phone lines and other utilities are risks to a business. The appearance of a building such as its walls, windows, and doors may require maintenance to continue drawing customers.

Injuries and damages may be *caused* by your business or your business may *receive* damage. For example, a storm may cause damage to a business or a business may cause damage by selling a faulty product. Either way, injuries and damages come with a cost.

Cash flow is the lifeline of a business. When unexpected costs affect the ability of a business to meet monthly expenses or when credit lines are lost, a business may fail. A plan to maintain cash flow is crucial.

Even new financing has its own cost-associated risks. The risks can include the following:

Instructor Notes

Presentation

Other Internal Risks

- **Cash flow changes**
 - Unexpected costs
 - Loss of credit lines
 - Expenses to establish lines of credit

SBA RISK MANAGEMENT 11

Slide 14

- Appraisal costs
- Closing costs
- Costs for points to buy down rates
- Deposits placed on hold as collateral

Are you prepared?

Discussion Point #2: Internal Risks

What other internal risks can a business owner control?

Activity 2: Internal Risks

10 Minutes

External Risks

SBA RISK MANAGEMENT 11

External Risks

Competition can be tough and market changes can make life for your business tougher if you are not prepared. Consider these risks:

- Market changes
- Employees may leave
- Rent increases

Instructor Notes

Presentation

Slide 16

Competition and Market Change

- Loss of clients or customers
- Loss of employees
- Decrease in sales prices/fluctuating markets
- Increases in vendor costs
- Oil or gasoline price increases
- Fixed cost changes (rent)

SBA

Slide 17

Business Environment Risks

- Laws
- Weather
- Natural Disaster
- Community

SBA

Slide 18

Competition and Market Risks

Market changes may cause businesses to change. Competitors advertise sales, wholesale costs go up and down, and oil and gasoline prices affect your costs and those of your vendor.

Employees may leave to go to a competitor's shop, taking loyal customers with them.

Rent increases may be caused by an increased demand for space. For example, you may be able to lease space more cheaply in a building/area under construction, but when the lease is up for renewal, an increased demand for space in the vicinity may result in your rent increasing.

Business Environment Risks

Your environment is more than the space you rent or buy. What happens around your business affects it. Here are some examples of environmental changes:

Federal, state, county, and city laws and ordinances can change.

Weather and natural disasters can shut down a business for a short period or close it.

Structural changes in the community may be the result of progress or may be due to empty stores and offices in a declining market.

Your community may change as the needs, age groups, spending habits, and incomes of the population change.

Instructor Notes

Presentation

Discussion Point #3: External Risks

You own a steak house. A tainted meat scare in your area changes demand. How do you manage this risk or control its effects?

Slide 19

Refer to the participant guide.

5 minutes**Personal Conflict Risks**

- Family obligations, illnesses or deaths
- Events of disaster that affect the home
- Community involvement
- Complacency

Slide 20

Discussion Point #3: External Risks

You own a steak house. A tainted meat scare in your area changes demand.

How do you manage this risk or control its effects?

Some ideas: Join with other restaurants in an advertising campaign on the safety of your beef or launch one of your own, make sure you have a cushion in the budget, contact chamber of commerce to address the issue publicly, contact the news media for an interview about your restaurant.

Personal Conflict Risks

Personal conflicts are external risks for both business owners and employees. Families and homes do not cease to exist at the start of a work day. Children become ill. Medical emergencies, or worse, may happen. Maintenance and other repairs will be required at home.

For a small business owner, involvement in the community creates visibility. However, the visibility comes with a cost, mainly time. Employees may be involved in activities outside of work that are not generally considered a business risk, but consider how you would handle this situation: your most reliable manager wants to attend an out-of-town playoff game with her child on the busiest day of the month.

Even complacency is a risk. Complacency comes from being comfortable. Your business may be successful and has been for a while. You may be comfortable with the hours you are working, but you may miss opportunities for growth because you do not want to expend the extra effort. Now, multiply the effect of complacency because complacency also happens to employees.

Instructor Notes

Presentation

Discussion Point #4: External Risks**Discussion Point #4: Risks to Continued Operations**

What is required for your business to continue operations?

RISK MANAGEMENT 21

Slide 21*Refer to the participant guide.***10 minutes****Risk Identification**

- Written business plan
- Outside sources to assist in identifying
- Risks of your vendors or supplier
- Business continuity assessment

RISK MANAGEMENT 22

Slide 22

What is required for your business to continue operations?

Risk Identification

One of the most important investments you can make in your business is creating a business plan, especially when identifying risks. Creating a business plan will help you assess areas of risk that could potentially impact your growth and the ability to continue business.

The continuation of your business, in the event of any risk, should be noted in your plan. Look at anything that could halt, slow, or affect the profit of your business. List these risks, rank them in importance, and look at potential costs. Identifying and assessing risks is something that will require time and should be revisited periodically. Be sure to schedule time in your calendar to identify areas of business risk.

Get help from outside sources in identifying areas of risk. Many of these sources are business-specific.

A business plan isn't something to create and set aside, simply to be used later to obtain financing. Once completed, the business plan will become your guide, just like a map.

Instructor Notes

Presentation

Warning Signs

Owning a business means keeping alert to potential risks. Pay attention to warning signs of risk.

Excessive Debt in Relation to Owner's Equity

Use the following formula to calculate a company's debt-to-equity ratio. First, determine total liabilities by adding your short-term and long-term obligations. Then, divide total liabilities by the owner's equity (found on the company's balance sheet). Generally, the debt-to-equity ratio for a business should not be above 40 percent or 50 percent. However, you can check similar types of businesses through a business reporting service or consult an accountant to obtain the normal range for your industry.

Reliance on Small Numbers of Customers, Products and Vendors

Relying on a small number of customers will cause a business to fail quickly if those customers are lost. Your business will need to always reach out to new types of customers with new products. Reliance on one product will limit your business when that reliance fails to allow for changes in customer needs, as well as changes in the market. Similarly, when your business relies on one or a small number of vendors, your business continuity plan is only as solid as your vendor's business. You are not in control.

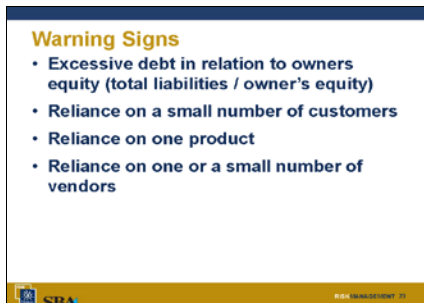

Cash Flow Problems

A very basic calculation of your cash flow starts with your business's cash balance at the beginning of the month. Cash receipts from all sources are added to this beginning balance and then all cash payments are subtracted from this total. The result is your ending cash balance. If your expenses are greater than your income, adjustments should be made. In general, you want your business to have a positive cash flow. Is your business able to pay monthly payments with no overdrafts? If you are having a hard time covering checks, your business has a cash flow problem.

Irregularities in Accounting, Bank or Timecard Records

Audits or spot checks of your accounting system may uncover errors or fraud. Some questions to answer as you move through audits:

- Do project or job sheets match what has been submitted for payroll?
- Do time sheets match what has been submitted for payroll?
- Does the payroll ledger reconcile with bank account statements?
- Are there outstanding checks to former employees?

Slide 23

Slide 24

Instructor Notes**Presentation**

- Are former employees still in the accounting system?

Irregularities in Computer System Administrative Reports

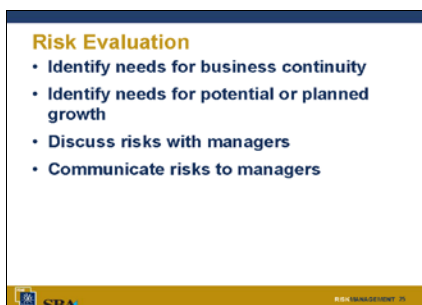

When reports from your computer system are generated, verify user access and system changes by considering these questions:

- Has any user access been changed since the last review?
- Is access for all users ordinary for their job functions?
- Do users who are no longer employed still have access to the system?
- Have changes been documented and approved?
- Are any transactions or changes out of the ordinary?

Employee Turnover Rate

Consider these questions when thinking about employee turnover:

- Does your business have a high rate of employee turnover?
- Is this a result of poor hiring decisions, lack of training, or the work environment?

10 minutes

Slide 25

Risk Evaluation

Once risks have been identified, consider next the impact each risk has on business operations and continuity. Also evaluate risks with regard to potential expansion or future growth. On a day-to-day basis, consult with your operations managers, as they may be more alert to possible risks. In fact, consult with all your key people to enlist their input and communicate to them the risks that you see.

Instructor Notes

Presentation

A slide titled "SWOT Analysis" with a bulleted list: Strengths, Weaknesses, Opportunities, and Threats. To the right of the list is a graphic of four interlocking puzzle pieces: a blue piece labeled "Weaknesses", a red piece labeled "Strengths", a yellow piece labeled "Threats", and a green piece labeled "Opportunities". The word "SWOT" is written in the center where the pieces meet. The slide has a small SBA logo and "RISK MANAGEMENT 26" in the bottom left corner.

SWOT Analysis

- Strengths
- Weaknesses
- Opportunities
- Threats

Slide 26

SWOT Analysis

Performing an analysis of your business's internal strengths and weaknesses and your business's external opportunities and threats may uncover overlooked risks. To be effective, a strengths, weaknesses, opportunities, threats (SWOT) analysis should be a very candid and honest assessment of the business. Remember, some risks can also be opportunities.

A slide titled "Other Resources" with five blue boxes arranged in two rows. The top row contains "Small Business Administration", "Audit Firm or CPA", and "Bank or Commercial Lender". The bottom row contains "Risk Insurance Provider" and "Internet Source". The slide has a small SBA logo and "RISK MANAGEMENT 27" in the bottom left corner.

Other Resources

- Small Business Administration
- Audit Firm or CPA
- Bank or Commercial Lender
- Risk Insurance Provider
- Internet Source

Slide 27

Other Resources

Seek outside help when assessing your business risks. The Small Business Administration (SBA) can provide many helpful resources. If funds permit, consider an auditing firm or certified public accountant (CPA). Talk with your bank or commercial lender about risks for your type of business. You may also want to consult a risk insurance provider. You can check the internet to find similar businesses or professional organizations which may share information on risks specific to your business.

A slide titled "Risk Measurement" with a bulleted list: Effect on potential earnings and cash flow, Impact on the business for future growth, Costs related to the risk, should it occur, What would change in your business as a result, and Weighing costs versus the benefits of the control. The slide has a small SBA logo and "RISK MANAGEMENT 28" in the bottom left corner.

Risk Measurement

- Effect on potential earnings and cash flow
- Impact on the business for future growth
- Costs related to the risk, should it occur
- What would change in your business as a result
- Weighing costs versus the benefits of the control

Slide 28

Risk Measurement

Once risks are identified and evaluated for their potential consequences, they should be measured by how they affect earnings, cash flow, and business operations.

A good example is water damage. A business that flooded may be cleaned up, reopened, and continue operations. But, the expenses for cleanup put a strain on the budget for months to come. Lost income is not the only thing to consider. For example, customers may move to businesses that did not flooded and not return to your business. This customer migration may require new advertising or new products to renew interest.

Loss of future profits (due to customer migration, for example) may be more costly than the direct loss of income. Scrutiny of all the costs associated with a risk is important for measuring risk.

Instructor Notes

Presentation

5 minutes

*Slide 29***Importance of Risk Management**

Minimizing and controlling the effects of risks can improve and maintain business cash flow. The continuation of cash flow creates stability for the organization and helps credit relationships remain intact, while building additional credit.

What does all of this mean? It means your business will continue. The longevity of a company will mean greater stability. Creditors will see this stability and good cash flow reflected in the financials of the company. The rewards of risk management are all linked together: good cash flow leads to stability, which leads to good credit, which leads to longevity.

15 minutes

*Slide 30***Risk Control Management and Implementation**

A written business plan should not only include a list of possible risks, but also include controls and plans to manage risks. Remember—keep your business plan current by readdressing changes in costs and by assessing new risks.

*Slide 31***Equipment and Vendors****Equipment**

Equipment that needs to be repaired may interrupt your business, but insurance or service plans may minimize your costs. For example, if your business is dependent on a high-speed printer or copier, a service plan may control the risk of the copier breaking down. Parts for a copier can be expensive and take time to replace. To be prepared, copier vendors will plan for parts and service based on the copiers they have sold to you, and the number of copies you make (service plans for copiers usually require an annual count of copies made). Higher usage may mean more maintenance.

Instructor Notes

Presentation

Vendors

Your vendors have risks, too—some of the same risks you face. Relying on only one vendor may be risky for your business. You may be able to avoid problems with your vendors by following these suggestions:

- Have more than one supplier for products.
- Shop for vendors with the best price and service.
- Maintain relationships with multiple vendors by buying from each of them.

A multiple-vendor strategy may make vendors push for more of your business, resulting in lower prices. In any event, if one vendor is unable to deliver, you will have backup.

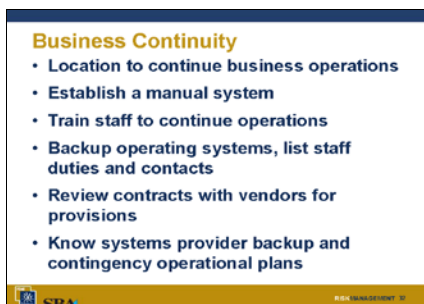

Do not be afraid to investigate the risks your vendor may face. Some of this risk information is provided by business credit reporting agencies or by insurance companies.

Business Continuity

Your operations manuals should include a business continuity plan. The plan should provide steps to take for short- and long-term situations. For example, if your business is unable to operate in its present location, is it possible to use another? If so, your plan should list the steps to take, by job position, for re-establishing operations at the backup site.

Create a set of standard operating procedures for completing tasks. Many businesses were started before extensive computer-based technology. Back then, these businesses operated by following manual steps. Describe the responsibilities for inputting manually-captured information into your computer system for when the system is running again. Train staff on your continuity plans and alternative strategies. Have trial runs or periodic testing of your manual systems.

Backup your computer systems and keep copies in a secured offsite location. Keeping additional computer capability at another location can mean being down for a few hours, instead of days. Software or operating systems providers may be able to assist in disaster recovery plans. Review or discuss these plans with your vendors.

Slide 32

Instructor Notes

Presentation

In your continuity plan, include the following:

- Staff members' duties
- Staff members' work locations
- Contact names, such as email addresses and phone numbers
- Vendor, utility, and emergency phone numbers
- Employee notification "phone tree" (for example, an owner calls managers and managers call their departments)

Just as you plan for these risks and the possible consequences, your vendors should as well. Ask your vendors about their business continuity plans. If they provide this information, add it to their file and include information that is pertinent to your own plan.

Keep a copy of your continuity plan in a place where your managers and staff can access it easily.

Information Technology Systems

Special risks are connected to information technology (IT) systems. Review the following risk prevention tips for IT systems:

- **Safeguard login information** such as personal user names and passwords. Personal login information should not be shared with anyone outside the business, or any other employee. Most businesses require employees to sign an IT statement that outlines the repercussions for sharing passwords.
- **Protect systems with firewalls** to stop intrusions. Use software to scan for viruses or other irregularities. These protections may require additional setup time and annual renewal fees. However, consider the cost a hacker or virus could cause by shutting down your system. In most cases, the benefit of protection will probably outweigh the cost.
- **Institute levels of access** within your organization by job duty. Someone who ships out inventory or accepts returns, for example, should have different access than those in accounting where credit is issued. Manager override authority should be reviewed periodically by using system-generated reports. Monitoring reports for out-of-the-ordinary transactions gives an added layer of security.

Slide 33

Instructor Notes

Presentation

- **Generate system reports**, which might include reports on system access, attempted security breaches, and patterns of usage. Audits of these reports, as well as reviews of changes made by system administrators should be conducted regularly.
- **Sample transactions or use trial transactions** to uncover changes in processing or fraudulent transactions.
- **Conduct scheduled and surprise audits** of IT systems.

Competition

While the competition cannot be controlled, you can at least know what they are doing.

Investigate what products they are carrying and how they are priced.

Consider these questions:

- Are your prices higher or within the market?
- Are you losing sales to them or do you have a competitive edge?
- If you think you have an edge, how can you maintain it?
- If their prices are much lower, is it time to revisit pricing with your vendors or search for new ones?
- Is their quality the same as yours?

Note how your competitor's staff interacts with your competitor's customers. Consider these questions:

- Does your business need training in any area?
- How are your competitor's employees interacting?
- Do your competitor's employees seem happy?
- Do you know what types of benefits your competitor's employees receive?
- Are your insurance and compensation packages competitive for the market?
- Are you attracting and keeping valuable employees?

The cost to retain employees may be less than to train new employees.

Activity 5: Assets

What is your most liquid asset?

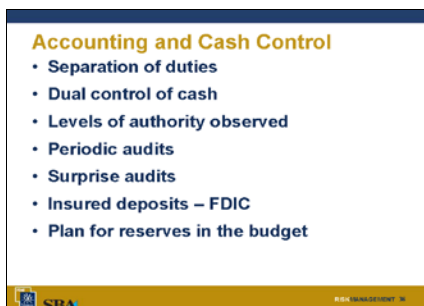

How can you protect it?

Slide 35

Refer to the participant guide.

Slide 36

Accounting and Cash Control

Potential for fraud or theft can exist without a separation of duties. The employee who accepts cash or payments, processes the work, deposits funds, and reconciles the related account may be tempted to commit theft. Consider setting up an audit trail with one person accepting and processing payments, another preparing the bank deposit, and perhaps another for reconciling statements. For all three steps, amounts should be verifiable.

Cash payments and arriving mail should be logged or verified by two people. Each person should count the cash in the presence of the other. This procedure sets up accountability and provides a record of the activity.

Job duties should have differing levels of authority. Some duties may require recorded supervisor approval. For example, the server at the restaurant may need approval of the shift manager to void the charge for a poorly served meal. Issuing credit for returned merchandise may require supervisor approval above a certain dollar amount.

Conduct periodic audits of cash to insure that it balances with all income records and bank statements. Surprise audits should be done at least

Instructor Notes

Presentation

quarterly and at different dates in the month. An established pattern may give an employee who has taken money the time to return it. If the surprise audit has not been conducted before the last week of the quarter, the audit will be predictable and a theft may go unnoticed before the stolen funds can be put back in the drawer. Consider that most employees expect to pay back stolen funds before the theft is detected.

No one can afford to lose cash if a bank fails. Before opening an account, confirm that the financial institution is FDIC-insured. If you have more than \$250,000 on deposit in the bank, you may have more--or less--deposit insurance coverage than you think: use the FDIC's online Electronic Deposit Insurance Estimator (EDIE) to calculate your FDIC insurance coverage.

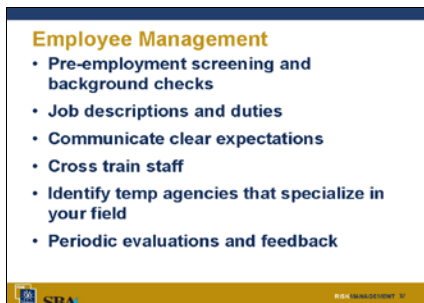

The FDIC insures deposits up to the maximum amount allowed by law. The standard deposit insurance amount is \$250,000 per depositor, per insured bank, for each ownership category. The National Credit Union Administration (NCUA) provides similar insurance coverage for deposits in insured credit unions.

Monthly budget projections should include a reserve amount for each month. This should provide a cushion to cover payments. An accountant may assist you in determining the amount to hold for additional cash flow, based on your financial statements.

Employee Management

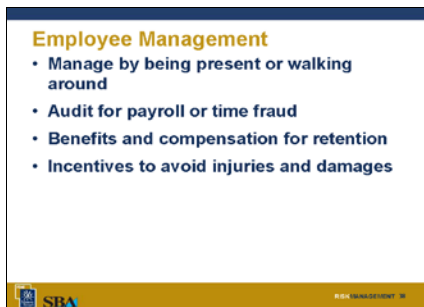

Your employees are important to the success of your business. Review these tips for managing your employees:

- **Use pre-employment screening.** Many business credit reporting agencies and human resource service providers will help you with pre-employment screening and background checks. Pre-employment screening is important for legal and insurance purposes. For example, you need to know if an employee is driving your car but their license is revoked or they are required to have a device to check for blood alcohol level.
- **Provide job descriptions and lists of duties.** Communicate job expectations and any job expectation changes to your employees. While it is important to separate duties, cross training your staff

Slide 37

Instructor Notes

Slide 38

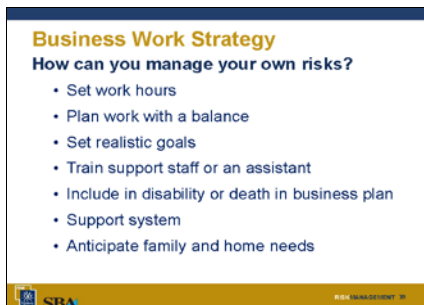

Presentation

helps to ease costs in the event someone leaves or the business is short staffed.

- **Provide performance evaluations.** Employees should expect evaluations to enhance their performance. Provide feedback and allow them to comment about their jobs.
- **Be involved.** A business cannot run on its own. Owners who are not present often find their business runs into problems. Let people know you are present. Get to know everyone by walking around your business. Talk with customers.
- **Audit payroll.** Audits should be conducted on payroll systems. Check project timecards against job sheets for appropriate time submission. Compare timecards to payroll ledgers and payroll ledgers to the payroll account.
- **Reward safe performance.** Injuries and damages can happen. Monthly departmental rewards for avoiding accidents may be less costly than premiums and damages resulting from carelessness. Safety procedure incentives may raise employee involvement in the process.

Business Work Strategy

How and when you and your employees work, impacts your business. Review these work strategy tips:

Slide 39

- **Set work hours.** Provide your employees with a tentative work schedule and keep them updated in advance of changes. Use a planner to map out your anticipated monthly, weekly, and daily work.
- **Plan work with a balance.** Avoid filling every minute. Allow extra time for unexpected events. Make sure you balance work with time off.
- **Set realistic goals.** Setting goals requires time to meet them. Make goals realistic for your business to avoid overextending yourself, burning out, and putting added stress on employees and your family.
- **Train support staff or an assistant.** A written business plan should include how to deal with the possibility of your disability or death. Train your support staff or assistant to handle short-term needs. Can a family member or someone else run the business in your place? Have you named someone to liquidate the business? Disability

Instructor Notes

Presentation

insurance may provide for your care and that of the business. Life insurance can also be purchased in amounts large enough to cover the liabilities of the business.

- **Develop a support system.** Support systems are vital to businesses and families. Do you have friends or services that can help your family when you can't be available due to work? Think about activities your family does on a weekly basis. You may need someone to help with these activities, as well with those that are unexpected. For example, waiting for a plumber or heating repair technician can take an entire day. Plan your support systems.

More on Control Management

Here are additional ways to manage risk:

Slide 40

- **Discuss risks.** Schedule regular meetings with managers to discuss risks. For example, add discussions of risk to sales meetings agendas.
- **Provide a safe workplace.** Employers have the responsibility to provide a safe workplace. Employers **MUST** provide their employees with a workplace that does not have serious hazards and follow all relevant federal, state, and local safety and health standards. See <http://www.osha.gov/workers.html#6>. You must post OSHA citations, injury and illness data, and the OSHA poster in your workplace where workers will see them.
- **Monitor the premises.** Also, create a checklist of the physical building that includes areas of upkeep, needs, and repairs. Complete a monthly walk-around to note areas that require attention. Have managers complete a weekly review of the facility for less significant items.
- **Be alert to community changes.** Be involved in the community or have someone who can update you on changes in the community that affect your business. Stay informed of federal, state, county, and local laws that could impact your business.
- **Use lines of credit wisely.** Lines of credit are important. Refrain from using the entire line to give yourself a margin of safety to deal with an emergency.
- **Speak with an insurance agent.** Speak with an insurance agent about business risks. Check to see if your business is in a flood zone

Instructor Notes

Presentation

requiring flood insurance. Whether you own or rent it is important to protect your business from fire, water, and other damage risks.

- **Consider a generator and secondary phone.** Consider the feasibility cost of a generator, what size generator would be needed, and how to implement the use of a generator safely. A backup phone may be as simple as listing a cell phone as a secondary business number and keeping the phone in your business location.

Lead by Example

Lead your business by example with honesty, integrity, and being ethical in all business deals. Convey this expectation to your employees and other people and firms with whom you do business as well.

Slide 41

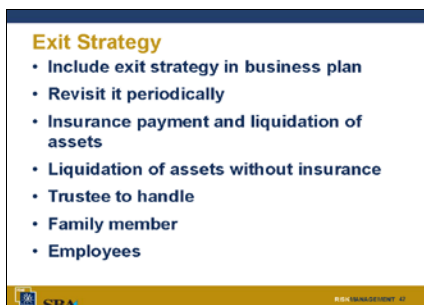

Exit Strategy

No one starting a business expects to fail, but planning for the worst is part of managing the risks involved with any business. Sometimes it becomes necessary to implement a business exit strategy. Under the worst of circumstances having an exit strategy will be important for your future and that of your family.

Include an exit strategy in your initial business plan and revisit it from time to time. Question you may want to consider:

- Have you provided for insurance in the event of your death?
- In the event of death, have you provided for the liquidation of assets?
- Are there sufficient funds to allow the liquidation of assets without additional insurance?
- What about disability benefits?

While some business owners name a trustee to handle the closing of a business, others may have active family members to assume business

Slide 42

Instructor Notes

ownership or perform the closing. Consider allowing employees to purchase the business instead of closing it.

Plan and Manage Risks to Succeed!

Much more could be said or learned about risk management. If you are interested in additional information, consider enrolling in a college course on accounting information systems, risk management, or business management. Use sources available through the SBA and others listed in this training.

Slide 43

10 Minutes

Top Eight Key Points to Remember

- There are internal and external risks associated with a small business
- Begin assessing the risks by completing a list of those events or resources involved with the business that could impact continued operations and cash flow
- The costs to insure or minimize risks should be weighed to the potential impact involved
- A business continuity plan should be part of your overall business plan

Slide 44

Top Eight Key Points to Remember

- Strategies to avoid risks can include: communication, setting expectations, support systems, training staff, insurance, assessment and contingency planning
- Be honest in reviewing your business for risk and warning signs
- Seek assistance from others
- An exit strategy is important

Slide 45

Eight Key Points to Remember

Much more could be said or learned about risk management. If you are interested in additional information, consider enrolling in a college course on accounting information systems, risk management, or business management. Use sources listed in this training or others available through the SBA.

Remember these key points:

1. Risks associated with a small business can be characterized as internal and external.
2. Begin assessing risks by listing events or resources that could impact continued operations and cash flow.
3. The costs to insure or minimize risks should be weighed against the potential impact of the risk.
4. A business continuity plan should be part of your overall business plan.
5. Strategies to avoid risks can include: communication, setting expectations, support systems, staff training, insurance, risk assessment, and contingency planning.
6. Be honest in reviewing your business for risk and know the warning signs.
7. Seek assistance from others.
8. Include an exit strategy in your initial business plan and revisit that

Instructor Notes

Presentation

strategy from time to time.

Summary

What final questions do you have?

Who would like to share one thing they learned from this training?

Now we will see what you have learned by completing *[a short Post-Test that is the second to the last page in the Participant Guide and/or the “After the Training” column of the What Do You Know? form that you completed earlier]*.

We would also like your feedback about the workshop. Please complete the Evaluation Form—this is on the very last page of the Participant Guide.

Conclusion

You learned about:

- Internal and external risks of a small business
- How to identify and reduce the negative effects these can have on your business
- Warning signs of risk
- The steps in risk management planning
- The importance of containing these risks
- The need for an exit strategy

Summary

- What final questions do you have?
- What have you learned?
- How would you evaluate the training?

For Further Information

Federal Deposit Insurance Corporation (FDIC)

www.fdic.gov

The Federal Deposit Insurance Corporation (FDIC) preserves and promotes public confidence in the U.S. financial system by insuring deposits in banks and thrift institutions for at least \$250,000; by identifying, monitoring and addressing risks to the deposit insurance funds; and by limiting the effect on the economy and the financial system when a bank or thrift institution fails.

The FDIC encourages bank lending to creditworthy small businesses. The FDIC also encourages small businesses that may have an inquiry or concern about the availability of credit to contact the FDIC Small Business Hotline at 1-855-FDIC-BIZ or www.fdic.gov/smallbusiness. Another FDIC web site, www.fdic.gov/buying/goods, provides resources to assist small businesses that may want to do business with the FDIC.

U.S. Small Business Administration (SBA)

www.sba.gov

SBA Answer Desk: 1-800-827-5722

The U.S. Small Business Administration (SBA) web site provides resources, answers to frequently asked questions and other significant information for small business owners.

U.S. Financial Literacy and Education Commission

www.mymoney.gov

1-888-My-Money (696-6639)

MyMoney.gov is the federal government's one-stop web site that provides financial education resources from more than 20 federal agencies.

Post-Test

Now that you've gone through the training, see what you've learned.

1. Which type of risk can generally be controlled?
 - a. Internal risks
 - b. Systematic risks
 - c. External risks
 - d. Market risks
2. It is possible to create a business plan that identifies every risk your business might face.
 - a. True
 - b. False
3. While reviewing your business plan you identified several risks that could halt, slow, or affect the profit of your business. What should you do with these risks?
 - a. List them by name
 - b. Rank by importance
 - c. Identify the potential cost
 - d. All of the Above
4. If needing help with risks associated with your business you should _____.
 - a. Work the risks by yourself
 - b. Seek outside assistance
 - c. Ignore the risks
 - d. Market the risks
5. Which of the following are common ways to avoid risk? Select all that apply.
 - a. Communicating risks you've identified to key employees
 - b. Making your expectations clear to employees
 - c. Developing support systems to care for your family needs
 - d. Training staff on the business continuity plan
 - e. Purchasing insurance
 - f. Planning emergency contingencies

Evaluation Form

Please fill out this evaluation form for the *Risk Management for a Small Business* training.

Training Rating

1. Overall, I felt the training was (check one):

- ☐ Excellent
☐ Very Good
☐ Good
☐ Fair
☐ Poor

Please indicate the degree to which you agree by circling a number.

| | Strongly Disagree | Disagree | Neutral | Agree | Strongly Agree |
|--|-------------------|----------|---------|-------|----------------|
| 2. I achieved the training objectives. | 1 | 2 | 3 | 4 | 5 |
| 3. The instructions were clear and easy to follow. | 1 | 2 | 3 | 4 | 5 |
| 4. The PowerPoint slides were clear. | 1 | 2 | 3 | 4 | 5 |
| 5. The PowerPoint slides enhanced my learning. | 1 | 2 | 3 | 4 | 5 |
| 6. The time allocation was correct for this training. | 1 | 2 | 3 | 4 | 5 |
| 7. The instructor was knowledgeable and well-prepared. | 1 | 2 | 3 | 4 | 5 |
| 8. The participants had ample opportunity to exchange experiences and ideas. | 1 | 2 | 3 | 4 | 5 |

Please indicate the degree of knowledge/skill by circling a number.

| | None | Advanced |
|---|------|----------|
| 9. My knowledge/skill level of the subject matter before taking the training . | 1 | 2 |
| 10. My knowledge/skill level of the subject matter upon completion of the training . | 1 | 2 |

Instructor Rating

11. Instructor Name:

Please use the response scale to rate your instructor by circling a number.

| | Poor | Fair | Good | Very Good | Excellent |
|--------------------------------------|------|------|------|-----------|-----------|
| 12. Made the subject understandable. | 1 | 2 | 3 | 4 | 5 |
| 13. Encouraged questions. | 1 | 2 | 3 | 4 | 5 |
| 14. Provided technical knowledge. | 1 | 2 | 3 | 4 | 5 |

15. What was the most useful part of the training?

16. What was the least useful part of the training and how could it be improved?
